1/2 Day: \$300/wk
Full Day: \$525/wk
Payment Plans
Sibling Discounts
All Materials Included
Space is Limited

Details & Registration www.wickedworkshop.org

Pineapples, Piranha Plants, & a Shrinking Submarine

June 2-6:

Minercraft SkyBlock

A test of survival! SkyBlock is one of the most popular Minecraft maps ever created. The concept of the game is to spawn on a floating island in the sky and use what's at hand to survive! Join us to explore limited resources, the current sand shortage and the story of cubism in architecture to create a unique hand-built version of our own Skyblock. This is a maker-based camp using crafting materials; no electronics are used.

June 9-13:

Super Mario's Castle

Jump back to 1992! Mario must reclaim his personal island, Mario Land, from the clutches of his greedy rival Wario. Explore design ideas inspired by the Space Zone, Macro Zone, Turtle Zone, Pumpkin Zone, Mario Zone, and Tree Zone. Use blocks, elevators, barrels, logs, gold coins and tubes to create Mario's castle where warp pipes lead to hidden areas, shortcuts, secret levels and hidden exits.

July 7-11:

Finn & Jake's Adventure Time Tree Fort

Serving as the watch tower on the edge of Candy Kingdom, Finn and Jake's Tree Fort houses the usual living room, bedroom, kitchen and bathroom. It also has more mysterious and undefined places like a treasure room, an attic, a storage cave, a "secret" place, a belvedere and several "abandoned" areas. Join us as we explore the more mysterious places within the tree to create our own unique Tree Fort.

July 14-18: SpongeBob's Undersea Paradise

Who lives in a pineapple under the sea? Explore the underwater architecture of Bikini Bottom! Inspired by SpongeBob SquarePants, we'll dive into the landmarks of Bikini Bottom to design our own versions of SpongeBob's Pineapple house, Squidward's Tentacles house, Patrick's Star house and Sandy's Tree dome.

July 21-25:

Phineas & Ferb's Favorite Summer Vacation Spots

With 104 days of summer vacation, explore some of Phineas and Ferb's inventions like the Shrinking Submarine, a Portal to Mars, the Backyard Fort and Doofenshmirtz Evil Incorporated to create our own unique Danville landmarks.

July 28-August 1:

Camp Half-Blood

Choose your godly parent and design your cabin! Inspired by Percy Jackson's Camp Half-Blood, we'll explore site design and master plan a summer camp using micro-city and retreat center design concepts. We'll learn about the 8-minute loop, systems thinking, walkable city strategies and cabin design using inspiration from mythology and the Camp Half-Blood chronicles by Rick Riordan.

How Does Camp Work?

Half Day Option:

We will concentrate our architecture presentation, discussion and main project building in the morning between 9-12:30.

Full Day Option:

Campers who choose to stay the whole day will enjoy games, outside play, short Videos and drawing/craft opportunities that align with our theme for the week.

***Choose the "Full Day Option" on the registration checkout page.**
